Forward

Dear Readers,

Around the globe, the Knorr-Bremse Group and brand stands as a pillar of excellence, a reliable, innovative and leading company driven to create the best solutions.

Knorr-Bremse Australia Pty Ltd

Anthony Fry SIGMA MID Group Manager

The SIGMA band synergy and capability of Knorr-Bremse and our local channel partners leads us

to align in 'One Brand' strategy. We are excited to communicate the renewal of the SIGMA brand and relaunch of the SIGMA website in Leading Thermal Management Solutions.

The SIGMA business continues to grow and evolve, from humble beginnings 65 years ago building the toughest and most reliable mobile HVAC systems for extreme duty mining, industrial and defence applications, to today leading thermal management solutions for production critical equipment and beyond.

We are focused on fulfilling our mission, "To engineer thermal management solutions in collaboration with our partners and deliver sustainable class-leading heating & cooling solutions".

We look forward to starting the discussion and creating value for our stakeholders, with sustainability and technology at the forefront of our endeavours in **LEADING THERMAL MANAGEMENT SOLUTIONS.**

Our Mission, Vision & Values

LEADING THERMAL MANAGEMENT SOLUTIONS

We aim to make a positive contribution to sustainability and efficiency on mines, industry and defence – both for our customers and our environment. Every day. All over the world.

Our Mission

To engineer thermal management solutions in collaboration with our partners and deliver sustainable class-leading heating & cooling solutions

Sigma Air Conditioning a division of the Knorr-Bremse Group, based in Munich Germany, the world's leading provider of system solutions for rail and commercial vehicles.

Designed & engineered in Australia for global deployment. With over 65 years of experience in specialised HVAC solution, we develop and design bespoke Heavy Duty Thermal Management Systems for the Mining, Industrial, Defence and Track maintenance markets and an OEM supplier to global brands.

From custom designs to providing Installation & maintenance services, we are Driven to Create the Best Solutions.

Our Location

SIGMA mining equipment is designed to the highest of industry standards to suit the harshest of mining conditions. Designed and engineered for production critical machines to withstand extreme ambient temperatures, punishing shock & vibration loads and dust saturated atmospheres.

INDUSTRIAL SOLUTION

The SIGMA range of industrial air conditioning equipment is specifically designed to operate in dust laden corrosive atmospheres and very high ambient temperatures of up to 65°C (149°F). Environments include aluminium smelters, refinery operated cabins, earthmoving equipment, ports, construction, cranes, switch rooms and other production critical industrial equipment.

DEFENCE SOLUTION

The SIGMA brand comprises a complete range of bespoke air conditioning solution, with a product to suit specific defence projects and application. SIGMA offer unique equipment to suit both static and mobile applications for protected mobility and deployable health shelters with the defence industry

TRACK MAINTENANCE

Drivers' comfort and safety is an important aspect to ensure the safe operation of rolling stock networks globally. SIGMA's track maintenance and locomotive driver's cab air conditioning systems and HEPA filtration have been designed to operate in some of the harshest conditions around the world, where outside temperatures exceed 50°C.

Thermal Management Solutions

SPLIT & PACKAGE SYSTEM

Complete HVAC units and split systems to suit a wide variety of application

- Industry leading standard features
- Easy installation
- Robust ecosystem with optional upgrades

INTEGRATED SYSTEM

Custom designed & built to suit specific OE vehicles

- Seamless integration
- Customisable cooling/heating, voltage & material type

DC HVAC TECHNOLOGY

Latest Thermal Management technology

- Idle free system
- Decoupling HVAC from the engine
- Batteries thermal management systems
- Data monitoring/downloads

FRESH AIR FILTRATION

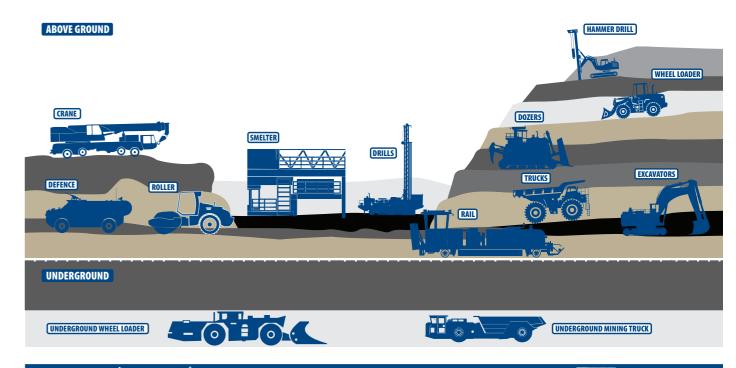

Filtration system to ensure consistent supply for fresh air for operator safety & comfort

- MERV 15
- HEPA filter

Vehicle Applications

KEEPING OPERATORS SAFE

Our aim is to provide high quality filtered fresh air into the cabin to help reduce exposure to harmful particulates and gasses. Provide positive pressure inside the cabin, allowing filtered air to leak out through minor gaps in the door seal and reduce the risk of dust ingress into the cabin

> High capacity HEPA filters and pressurisers designed using heavyduty steel construction that are suitable for production critical mobile fleets.

> > Class leading cabin monitoring, to ensure operators are kept safe, with minimum pressure limits and maximum CO2 limits observed.

BREATHE EASIER WITH THE SIGMA HEPA FILTER The Workplace Health & Safety (WHS) and Mine Safety & Health Administration (MSHA) solution for dust saturated atmospheres and harmful toxic working environments. Ensuring cabin air is safe to breathe and free from airborne contaminates including pesticide, asbestos, silica dust, fine coal dust and diesel particulate matter.

DRIVEN TO CREATE THE BEST SOLUTIONS

"We want to be the global driving force behind innovative and sustainable system solutions that make mobility and freight transportation safer, more reliable and more efficient. We ourselves are driven by the desire to add value for our customers while also making a positive contribution to society."

Knorr-Bremse has pursued a single mission for over 110 years: to make mobility on roads and railways safe, sustainable and environmentally friendly. Today the Knorr-Bremse Group, based in Munich, is the world's leading manufacturer of braking systems and a leading supplier of safety-critical sub-systems for rail and commercial vehicles.

OUR DIVISIONS

Rail Vehicle Systems division

In our Rail Vehicle Systems division we equip mas transit vehicles such as metro cars and light raivehicles, as well as freight trains, locomotives, long distance passenger trains and high-speed trains with highly advanced products. Along with braking systems these include intelligent entrance systems HVAC systems, auxiliary power supply systems control components and windscreen wiper systems platform screen doors, friction material, drive assistance systems, electrical traction equipment and control technology.

Sophisticated interplay: mechanics and

When creating our system solutions, we draw or our unrivalled command of the complex interplay between electronic and mechanical components.

Tried-and-tested combination: reliability and sustainability:

As a family firm with a pool of expertise acquired over more than 110 years, we stand for reliability and sustainability in our mindset and our activities – and we spare no effort to keep our promises

Innovative solutions: local presence and global

Innovations drive Knorr-Bremse forward. When we innovate, we draw upon an in-depth understanding of market needs and customer requirements applying a blend of local knowledge, responsible management and the expertise of a global high-tech player.

Crucial basis: outstanding employees pave the way to success:

Our success is founded on motivated, dedicated and highly focused employees, which is why we also invest in their development.

Commercial Vehicle Systems division

The Commercial Vehicle Systems division offers its customers braking systems for trucks, buses, trailers and agricultural machinery. In the chassis systems sector, Knorr-Bremse is a leading player in electronic control, driver assistance and air supply systems. Other product fields include steering systems, powertrain-related systems and torsional vibration dampers for diesel engines.

SERVICE & SPARE PARTS SUPPORT

SIGMA's Customer Support Group recognises the need for total product support and all service and spare parts facilities are geared to provide this support. Close cooperation with equipment suppliers and end users is of paramount importance; such that all equipment-running requirements are strictly compliant at all time.

TRAINING

SIGMA provides customer service schools and training programmes. These programmes are structured to acquaint customer service personnel with the basic features, installation, operating and service of SIGMA equipment.

QUALITY ASSURANCE

- ISO 9001:2015 certified company
- RIS Certification ISO/TS 22163:2017
